EDUCATION

KIET Group of Institutions, Ghaziabad

B.Tech - Computer Science and Engineering (AI)

2023 – 2027

Ghaziabad, Uttar Pradesh

PROJECTS

AI Task Planner 🔗 | Python, FastAPI, Streamlit, Gemini API, Multi-Agent AI

Feb 2026

- Developed an AI-powered software engineering agent that transforms natural language project ideas into complete implementation plans and production-ready code.
- Implemented a multi-stage AI workflow for requirement analysis, system design, code generation, debugging, and validation using large language models.
- Built scalable backend APIs to orchestrate project planning, code generation, testing, and workflow management across multiple development stages.
- Automated the software development lifecycle from idea generation to tested implementation, reducing manual development effort and accelerating project delivery.

AI-Powered PDF Reader 🔗 | Python, FastAPI, Streamlit, FAISS, RAG

Jan 2026

- Developed an AI-powered PDF Question Answering system using Retrieval-Augmented Generation (RAG), FAISS, and embeddings for semantic document retrieval.
- Implemented a RAG pipeline with document chunking, embedding generation, and vector similarity search for accurate context retrieval.
- Built a scalable FastAPI backend with RESTful APIs for document ingestion, embedding management, and semantic querying.
- Designed a Streamlit-based interface for PDF upload and AI-powered question answering, delivering an end-to-end user experience.

AI-Powered Job Market Intelligence Platform 🔗 | Python, Streamlit, Data Analytics

May 2026

- Developed an AI-powered Job Market Intelligence Platform to analyze real-world job postings and identify hiring trends, salaries, and in-demand skills.
- Applied data preprocessing and exploratory data analysis (EDA) using Pandas to uncover insights from large-scale job datasets.
- Built interactive Streamlit dashboards with Plotly for visualizing salary distributions, company demand, and technology trends.
- Designed a modular analytics platform enabling scalable data exploration and real-time business intelligence reporting.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript

Frameworks: FastAPI, Flask, Streamlit

Libraries: Pandas, NumPy, Matplotlib, Seaborn, FAISS

Technologies: LLMs, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, Embeddings

Tools: VS Code, PyCharm, Jupyter Notebook, Git, GitHub

CERTIFICATIONS

- AWS Certified AI Practitioner
- Palo Alto Cybersecurity Fundamentals
- Forage Data Analytics Virtual Experience

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems on LeetCode.
